PROJECT DESCRIPTION

Coating Surface: Heat exchanger cover, carbon steel base.

Purpose: Prevent heat loss from heat exchanger cover thereby increase energy efficiency

COATING SOLUTION

HOT PIPE COATING – 3 applications after grinding the metal surface (total 12 – 15 mm)

SUPER THERM – 2 applications for sealing (200 micron in thickness)

ENAMO GRIP – 1 application for smooth surface (75 micron thickness)

PRODUCTS USED:

[Hot Pipe Coating™](#)

[Super Therm®](#)
