

## CONTAINER HOME – NEW YORK CITY

### PRIVATE HOME

- Markets: Housing & Renovation
- Country: USA
- Courtesy of: Superior Products International

### PROJECT DESCRIPTION

*“This residence is made up of six shipping containers stacked atop one another, and is the first and only legal residence of its kind in Brooklyn. Contractor David Boyle and his architect wife, Michele Bertomen, built the home on a 20-by-40-foot piece of land. The shipping containers are connected with a stairwell in the middle. The house is heated via radiant heat, with pipes running heated water through the concrete floors.”*
