

INDUSTRIAL VALVES

CONFIDENTIAL

- Markets: Industry & Manufacturing
- Country: Poland
- Courtesy of: Superior Products Poland

PROJECT DESCRIPTION

Two valves in a production line needed to be insulated in order to reduce the exterior temperature and reduce loss of energy.

- Medium = hot water 150°C
- Surface temperature = 130°C

COATING SOLUTION

HOT PIPE COATING was applied -> Coverage : wet = 3,5 – 4,0 mm

RESULTS

Surface temperature after application:

- With laser pirometer: 70°C
- With bimetal: 60°C

PRODUCTS WE USED

[Hot Pipe Coating™](#)
