

BOAT HOUSES

AQUA LODGE

- Markets: Housing & Renovation, Shipping & Transport, Warehouse & Buildings
- Country: Guadeloupe
- Courtesy of: Superior Products France

PROJECT DESCRIPTION

Aqua Lodge has completely self-sufficient boat houses in Guadeloupe. The boat lodges are 80m² and built to accommodate 4-6 people. The lodges are eco-friendly as they are run on solar energy and emit no pollutants. Due to the location of the boat houses and the need to keep the electricity to a minimum, the owners were looking for a way to decrease the effects of the solar heat.

Shipping & Transport Market

COATING SOLUTION

Standard application of SUPER THERM was done after cleaning – 2 layers by roll (400 μ WFT / 250 μ DFT).

RESULTS

After application of SUPER THERM, with an ambient temperature of 30.1°C a reading of 42.7°C was taken on the untreated surface while the reading on the SUPER THERM surface was 30.3°C.
