PROJECT DESCRIPTION

Combination of RUST GRIP & ENAMO GRIP used in contract work completed by Dubai Dry Docks.

COATING SOLUTION

After testing the RUST GRIP on deck, the customer was impressed with the results and the easy application, including not having to sandblast. The only preparation was a surface scrub to remove any old loose paint, followed by a high pressure wash, then 200 micron RUST GRIP, and the covered with ENAMO GRIP GREEN.

Dubai Dry Docks were very pleased and scheduled 5 other ships to be coated.

PRODUCTS WE USED

Rust Grip®
Enamo Grip
