

LIQUID GAS RESERVE

A GERMAN CITY COUNCIL

- Markets: Telecom & Infrastructure
- Country: Germany
- Courtesy of: Superior Products Germany

PROJECT DESCRIPTION

A tank-installation for a German city's liquid gas reserve needed to be treated with a coating solution that would reduce the impact of the high outside temperatures in summer.

COATING SOLUTION

First the tanks were cleaned with steam jet at 1000 bar max.

- 1 coat RUST GRIP as primer & protection against corrosion (consumption approx. 200ml/m²)
- 2 coats SUPER THERM as thermal control to diminish interior temperature in tanks – applied with a high-pressure air-less system (consumption approx. 300 ml/m²)
- Final coat with ENAMO GRIP to toughen surface against environmental influences and protection against graffiti (consumption approx. 170 ml/m²).
