

YACHT MARINA INFRASTRUCTURE

MARINETEK

- Markets: Telecom & Infrastructure
- Country: Gibraltar
- Courtesy of: Superior Products Europe

PROJECT DESCRIPTION

The customer had two hundred 3m long 200mm x 200mm composite beams (Glass Reinforced Fiber Polymer) beams being used to reinforce a walkway at a marina in Gibraltar. The customer was in need of a product which could be applied on site to provide fire protection.

COATING SOLUTION

After diligently cleaning and preparing the surface, SUPER THERM was applied at 400 micron WFT, to achieve 250 micron DFT.

PRODUCTS WE USED

Super Therm®
